

CLAIMS

Sub ~~13~~ 1. A device for holding a golf ball, the device being adjustable for height, the device comprising

a body having a plurality of sections,
one of the plurality of sections having a cavity for supporting a golf ball, and
means for disconnecting the plurality of sections.

B
a 2. The device according to claim 1 further comprising means for connecting the
different sized
plurality of sections.

3. The device according to claim 1 wherein the body has a shape.

3 4. The device according to claim 3 wherein the shape of the body is pyramidal.

a 4. The device according to claim 1 wherein the plurality of *different sized*
sections are
contiguous.

a 6. The device according to claim 1 wherein the means for disconnecting the
different sized
plurality of sections comprise perforations.

a 7. The device according to claim 2 wherein the means for reconnecting the
different sized
plurality of sections comprise tabs and receptacles interengagable with the tabs.

8. The device according to claim 1 further comprising means for engaging the
surface of a tee box.
